MEMORANDUM FOR: Chief, Military-Economics Division, ORR

25X1 ATTENTION: []

THROUGH: Chief, Requirements Branch, Reconnaissance Group, CGS

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Construction Timing of Category II SA-O SAM Sites

REFERENCE: (a) Requirement C-RR-3-80,575
(b) CIA/PID Project C 1284-63

1. This memorandum is in response to your requirement dated 16 September 1963 which requests analysis of applicable [] photography to determine construction timing at 20 Category II SA-O SAM sites identified to date in the USSR.

25

2. The analysis of all coverages of this type SAM sites revealed the following:

a. There is no indication that an additional Category II SA-O is co-located with the normal revetted SA-2 at any location other than Tyura Tam.

b. Except for one instance (Dolon), the size of the immediate support facility at the SA-2 sites did not appear to change when the SA-O appeared. At the Dolon/Semiyarsk site, two buildings were enlarged coincident with the appearance of the SA-O. A line drawing of this site is included as an attachment to this memorandum.

c. It has been determined that by definition a Category II SA-O SAM site is one that is usually unrevetted and always co-located with a normal SA-2. Because of this it can be stated that usually any Category II SA-O that is identified is by definition occupied. Under 'Remarks' in the attached table a statement is made where possible as to the identification of equipment at the revetted SA-2's studied on this project.

d. Also included in the aforementioned table are negation dates for these sites when possible, and the dates and missions when a site was first observed on photography.
